Software engineer graduate, passionate about front-end web development with 2 years' experience in HTML, CSS, JavaScript, and SASS. problem-solving, keeping up with the new technologies and frameworks., and developing my skills in programming.

PROJECTS

Insure landing page ⧉
- The landing page was designed by Frontend Mentor. I used HTML5 along with CSS and JavaScript for mobile navigation toggle.
- This project required me to build a fully responsive landing page to the designs provided.

Dashboard with theme switcher ⧉
- A social media dashboard with light and dark theme toggle. Responsive design.
- This project was the perfect chance to practice my CSS Flexbox skills. The color theme switched implement with JavaScript.

Intro component with sign up form ⧉
- Building out a sign-up form complete with client-side validation using JavaScript. . Responsive design.
- Design by Frontend mentor.io

Template -NA-News ⧉
- Multi-page website coded in HTML/CSS/ CSS Grid. Responsive design.
- I made this template website as additional practice in Grid Layout skills.

FAQ Accordion Card ⧉
- FAQ page/ JavaScript/CSS.
- Responsive FAQ accordion. This is an extremely common front-end pattern, so it was a great opportunity to get some practice in. Using JavaScript/CSS.
