

Noor Alhijab

Burke, VA | (585) 454-9410 | noor.m.alhijab@gmail.com | [Linkedin](#) | [Github](#) | [Portfolio](#)

Professional Summary

Secret-cleared software engineering and data professional with experience in software development, AI/ML data workflows, data quality analysis, and cloud-based solutions. Skilled in Python, SQL, pandas, AWS, and data validation, with experience evaluating model outputs, improving dataset quality, and ensuring data accuracy and consistency. Adaptable and collaborative, with strong communication skills and experience working across diverse teams. Holds multiple AWS certifications and is bilingual in English and Arabic.

Technical Skills

Operating Systems: Windows, Linux

Software: Microsoft (Word, Excel, PowerPoint, Outlook, Calendar) and Google Workspace

Cloud Computing: Cloud concepts and AWS services, installing and configuring the AWS CLI, using AWS Systems Manager, creating a website on S3 and Amazon EC2 instances, scaling and load balancing the architecture, and configuring an Amazon VPC

Networking: Basic knowledge of networking protocols and concepts, creating an AWS Virtual Private Cloud, launching EC2 instances, Security Groups, NACLs, subnets, and Internet Gateways

Linux: Fundamental working knowledge of the Linux operating system and shell scripting, connecting to Linux instances from Windows using PuTTY, editing and working with files, users, and groups, managing file permissions, working with commands, and managing processes

AI & Automation Tools: ChatGPT, Microsoft Copilot, prompt engineering for troubleshooting and research, AI-assisted documentation and workflow support

Programming & Data: Python, SQL, data cleaning, data validation, data processing, data analysis

AI & Data Quality: Data annotation, AI/ML data validation, model output evaluation, prompt optimization

Development & Tools: Git, GitHub, JIRA

QA & Testing: Manual testing, functional testing, regression testing

Web Technologies: JavaScript, HTML, CSS

Education

Per Scholas | AWS re/Start Training | Burke, VA

11/2026

- This rigorous, full-time, 15-week virtual re/Start Training program provides an understanding of Cloud Computing Services, Networking, Databases, and AWS Cloud Management, Monitoring, and Governance Services.
- Attended weekly professional development to build a personal brand, create a strong technical resume, practice professional communication and collaboration skills, and develop the skills needed to succeed in a technical environment.
- Course Focus: Linux, Python, Auto Scaling, EC2, Lambda, Shell Scripting, Cloud Concepts, Network Firewall, AWS Systems Manager, Redshift, and DynamoDB.

Code the Dream | Data Engineering Program | Remote

06/2026

- Completed approximately 220 hours of training covering Python, data engineering, data cleaning and validation, databases, SQL, web scraping, and data visualization.
- Course Focus: Python, Data Engineering, Data Cleaning and Validation, Data Wrangling and Aggregation, SQL and Database Integration, Web Scraping, and Data Visualization.

Bachelor of Science (BS), Software Engineering
Baghdad College of Economic Sciences University, Baghdad, Iraq

Certifications

IT Specialist Python	06/2024
AWS Certified SysOps Administrator – Associate	11/2023
AWS Certified Solutions Architect – Associate	09/2023
AWS Certified Cloud Practitioner	06/2023
Microsoft Certified: Azure Fundamentals	06/2021

Professional Experience

AI Data Specialist | Meta via TEKsystems, Remote 02/2025 – 02/2026

- Reviewed and validated approximately 250 data records per week to improve dataset quality and support AI/ML model training, identifying annotation errors through structured validation.
- Evaluated approximately 1,000 model outputs for accuracy, relevance, instruction-following, and behavioral quality, identifying patterns that informed iterative model improvements.
- Performed structured quality checks and documented model performance trends, data quality issues, and improvement recommendations to support iterative dataset and model refinement.
- Refined prompts and response criteria across AI/ML tasks, improving consistency and alignment with project guidelines.

Projects

Weather Data Dashboard 03/2026

- Built an end-to-end weather data pipeline using Python, Selenium, pandas, SQLite, SQL, and Streamlit to scrape, clean, transform, store, and visualize weather data.

Global Superstore Analysis 02/2026

- Cleaned and analyzed the Global Superstore dataset using Python, pandas, Matplotlib, and Seaborn to identify sales, profit, shipping, and discount patterns.

AWS Lambda Image Resizer 05/2024

- Built a serverless AWS solution using Lambda and S3 to automatically resize uploaded images and store the resulting thumbnails in a separate S3 bucket.
